

Career Pathways: OSHA-10 Hour Certification *(Sept. 2026 Newsletter)*

To kick off our Career Pathways Training release, we're highlighting the versatile **OSHA 10 Certification**. This certification primarily falls under the **Facility Management Career Pathway** umbrella, but it can also be useful as a workplace safety training in these career pathways: **Food Service, Customer Service, Health & Social Services**.

The OSHA-10 training covers essential workplace safety, including hazard recognition, equipment use, and employee rights. It's an industry-recognized credential that can give job seekers a competitive edge in construction, facilities, maintenance, warehousing, retail, shipping/receiving, manufacturing, and more industries! Many employers either require or prefer candidates to have this certification.

Training Details:

- Possible providers: [360 Training](#), find additional options here: [USDOL OSHA "Find a Trainer"](#)
- Cost: \$60-90, varies by provider
- Length: 10 hours, usually across 2 days
- Skill level: Entry level
- Delivery method: Asynchronous, virtual live, or in-person
- Language: English and Spanish, varies by provider

OSHA 10 is offered in two versions: **Construction** and **General Industry**. Most job seekers will take the General Industry version.

Training costs for an industry recognized certification don't have to come out of your SA1 budget - they can always be charged to your roomier SA5 budget! Please remember to enter any additional training into GPMS as a Training Service so it is recorded appropriately.

Training information posted in the newsletter will also be available on CWI University, so you can reference it at any time.

If you have questions or need support identifying appropriate training options, please reach out to me directly at KLewis@cwivworks.org.
